- **Languages:** TypeScript, JavaScript, Swift, Java
- **Libraries/Frameworks:** NextJs, NuxtJs, ReactJs, StorybookJS, NodeJs, ExpressJs, Redux, Springboot, Firebase, UIKit, Bootstrap, Material UI, TailwindCSS
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Tools:** Docker, Kubernetes, GCP, AWS, Kafka, BullMQ

WORK EXPERIENCE

Software Engineer

2023-Present

Devsinc

San Francisco, California, USA

- Worked within a monorepo environment, overseeing the development of four distinct **Next.js** microservices applications (Admin, Client, Talent, common-components) architecture using **Turbo JS**.
- Consistently delivered optimized, organized, and well-documented code following the **DRY** principle, reducing redundancy, and increasing maintainability and scalability of the application.
- Published **React** components library and packages as NPM modules, promoting code reusability and efficiency.
- Demonstrated expertise working with non-relational databases i.e. **MongoDB** using Mongoose ORM and relational databases i.e. **SQL** and **PostgreSQL** using Sequelize ORM within the **NodeJS** environment.
- Successfully contributed to both the web application and admin panel by utilizing **React**, including implementing new features that enhanced the functionality of both platforms.

Software Engineer

2022-2023

I2c Inc.

Redwood City, California, USA

- Revamped legacy source code for multiple production micro applications, resulting in improved usability, build and significant faster runtime performance.
- Led a team of four professionals in the successful migration and testing of builds and repositories for over 100+ critical fintech micro applications, ensuring a seamless transition and uninterrupted service delivery.
- Pioneered the development of multiple microservices applications for the fintech sector from the ground up, adhering to best coding practices and employing cutting-edge methodologies to ensure robust and efficient solutions.

PROJECTS

RemoteReps

RemoteReps is a freelancing platform that facilitates connections between businesses and independent professionals and agencies worldwide. Companies can post job opportunities and hire top talents globally. Conversely, talented individuals can apply to various top companies and secure employment opportunities.

React Flavor

React Flavor is a **React** component library that includes over 30+ input, and design components, each offering numerous props to achieve the desired functionality or appearance. The library seamlessly integrates with Tailwind CSS and allows for full customization according to specific needs.

[Lokafy](#)

Lokafy is a traveling platform that revolutionizes the way we experience travel. With a core belief that the essence of travel lies in the people we meet, rather than just the places we visit, Lokafy fosters meaningful connections between travelers and locals worldwide.

EDUCATION

FAST - National University of Computer and Emerging Sciences

Bachelor of Computer Science

June. 2020
