SKILLS

- **Languages:** TypeScript, JavaScript, Java
- **Libraries/Frameworks:** NextJs, ReactJs, NodeJs, ExpressJs, Redux, Springboot, Firebase, Bootstrap, Material UI, TailwindCSS
- **Databases:** MongoDB, MySQL, PostgreSQL, MongoDB
- **Tools:** Docker, Kubernetes, GCP, AWS, Kafka, BullMQ

WORK EXPERIENCE

Software Engineer
Devsinc   *2023-Present*

- Worked within a monorepo environment, overseeing the development of four distinct **Next.js** microservices applications (Admin, Client, Talent, common-components) architecture using **Turbo JS**.
- Consistently delivered optimized, organized, and well-documented code following the **DRY** principle, reducing redundancy, and increasing maintainability and scalability of the application.
- Published **React** components library and packages as NPM modules, promoting code reusability and efficiency.
- Demonstrated expertise working with non-relational databases i.e. **MongoDB** using Mongoose ORM and relational databases i.e. **SQL** and **PostgreSQL** using Sequelize ORM within the **NodeJS** environment.
- Successfully contributed to both the web application and admin panel by utilizing **React**, including implementing new features that enhanced the functionality of both platforms.

Associate Software Engineer
I2c Inc.   *2022-2023*

- Revamped legacy source code for multiple production micro applications, resulting in improved usability, build and significant faster runtime performance.
- Led a team of four professionals in the successful migration and testing of builds and repositories for over 100+ critical fintech micro applications, ensuring a seamless transition and uninterrupted service delivery.
- Pioneered the development of multiple microservices applications for the fintech sector from the ground up, adhering to best coding practices and employing cutting-edge methodologies to ensure robust and efficient solutions.
- Played a key role within a Scrum framework, collaborating with cross-functional teams to provide clients with up-to-date and top-notch services, aligning development processes with agile principles for optimal project outcomes.

PROJECTS

Flavor
Flavor is a **React** component library that includes over 30+ components, each offering numerous props to achieve the desired functionality or appearance. The library seamlessly integrates with Tailwind CSS and allows for full customization according to specific needs.

HireIt
HireIt is a freelancing platform that facilitates connections between businesses and independent professionals and agencies worldwide. Companies can post job opportunities and hire top talents globally. Conversely, talented individuals can apply to various top companies and secure employment opportunities.

EDUCATION

FAST - National University of Computer and Emerging Sciences
Bachelor of Computer Science   June. 2022
